# Pneumatic Immersion Vibrators

These are used throughout the general building, public works and pre cast works industries. The vibrating head houses the bearing free turbine and twin hoses (fitted one inside the other). The internal hoses convey compressed air to the turbine and external hose exhausts.

## VL Series Vibrators

**USE:** General building, public works and pre cast works

**Description:** The vibrating head, houses the bearing free turbine and twin hoses. Fitted one inside the other. The internal hoses convey compressed air to the turbine and external hose exhausts

**Head:** Fully hardened alloy steel. Available in six sizes.

**Speed control:** Shaft twist action-variable speed

**Maintenance:** Service by removal of nosepiece only to replace vane.

**Options:** Oil bottles and extended hose length

**Warranty:** 12 Months

## Specifications

Model	VL25	VL35	VL45	VL55	VL75	VL87
Head Dia.	25mm	35mm	45mm	55mm	75mm	87mm
